## *HVRCF Examination of Club Safety and Guidelines*

### **True or False** ( circle one )

- True False No aircraft will be intentionally flown south of the flight line.
- True False After takeoff the first turn is always away from the flight line.
- True False In no wind flying situations the standard circuit direction is to the left.
- True False No aircraft will be flown north of the railway tracks for any reason.
- True False A range check is preformed before a model's first flight of the day.
- True False No aircraft will be armed or started in the shelter area.
- True False All models are flown within the line of sight of the pilot and in any case no farther than 500 meters.
- True False We will not fly higher than 300 feet.
- True False It is each pilots responsibility to ensure their model is not too noisy in flight while doing maneuvers.
- True False FPV flying requires a spotter.
- True False Membership and MAAC cards are to be hung on frequency board before flying.
- True False It is improper for a member to help another member understand proper field procedures.
- True False Electric powered models are exempt from the field safety procedures because electronics never fail.
- True False All Pilots must sign in the field log book before flying.
- True False The combination to the first aid box can be found on the back of your membership card.
- True False In the event of a out of control model being a potential hazard to general aviation you must call the tower a Person International to apprise them of the potential hazard. Call 905 676-4509.
- True False You do not need to be standing in the pilot station to fly your model.
- True False HVRCF operates a float flying site and an indoor flying site in addition to the main field.
